SUMMARY

Laravel Developer with 8 months of experience at Fablead Developer Technolab, skilled in building dynamic web applications using Laravel, PHP, and MySQL. Proficient in REST API development, Blade templating, and MVC architecture. Experienced in integrating third-party APIs and managing backend logic. Passionate about clean code, performance optimization, and continuous learning.

WORK EXPERIENCE

Laravel Developer

Sept, 2024 - Present

Fablead DevelopersTechnolab

- Developed and maintained dynamic web applications using Laravel and PHP.
- Designed and implemented RESTful APIs for mobile and web applications.
- Handled backend logic, database operations with MySQL, and CRUD functionalities.
- Integrated third-party services (e.g., payment gateways, SMS/email APIs).
- Implemented user authentication, role-based access control, and middleware.

Projects

1. Clinic Management System

- Developed complete frontend and backend using Laravel and Bootstrap.
- Created REST APIs for appointments, patient records, doctors, services, and invoices.
- Implemented role-based access for doctors, staff, and admins.

2. Personal OS & Founder OS

- Contributed to backend logic and API creation for task management and scheduling features.
- Managed user authentication, dashboard analytics, and notification systems.

3. LTE Project Management System

- Designed backend APIs for managing tasks, teams, and project timelines.
- Ensured secure data access using Laravel policies and middleware.
- Integrated with frontend for real-time project tracking and reporting.
